A screenshot of the MEDBRIDGE website interface. The browser window title is "MEDBRIDGE". The main heading is "Telehealth: An Introduction to Virtual Care". Below this, there is a video player showing a woman performing a physical therapy exercise on a blue exercise ball. To the right of the video player is a "Start Course" button. Below the video player, there is a smaller video thumbnail showing a woman speaking, with the name "J.J. Mowder-Tinney" and her credentials "PT, PhD, NCS, CCSRS, CNDT, CSEA" listed below it. The background of the entire image is a faded photo of a woman with curly hair looking at a tablet.

Digital Healthcare

Trend 1:

Consumerization of Healthcare

Access to care

**Ease of using
healthcare services**

**Quality customer
service**

of consumers
**prefer digital
offering for
minor conditions**

[EY, 2023](#)

of consumers
**prefer digital
offering because
“it saves time”**

[EY, 2023](#)

of people who
have used virtual
care said they
would use it again

[Evernorth, 2023](#)

83% of patients say convenience
is more important to them now
than it was 5 years ago.

Lederman & D'Alfonso, 2021

Trend 2:

Rapid Growth of Digital Healthcare

amazon.com® > one medical

 Cigna® > MDLIVE®

 CVS Health® >  signifyhealth®

 >  H-E-B Pharmacy

Walmart  >  MeMD®

Trend 3:

Capacity Challenges

Average wait time for a...

Physician: **26 days**

PCP: **20.6 days**

Cardiologist: **26.6 days**

Ortho Surgeon: **16.9–55 days***

* depending on the market

[AMN Healthcare, 2022](#)

183 Million

people in the US currently
live in areas without
sufficient access to a PCP

[AMA, 2023](#)

of clinicians surveyed say they are experiencing burnout

[APTA](#)

21,000

PTs left the field in 2021

[APTQI](#)

30+ days

is the average wait time to see a physical therapist

[APTQI, 2017](#)

Expertise**

Digital Care

**Stronger Therapeutic Alliance +
Outcomes**

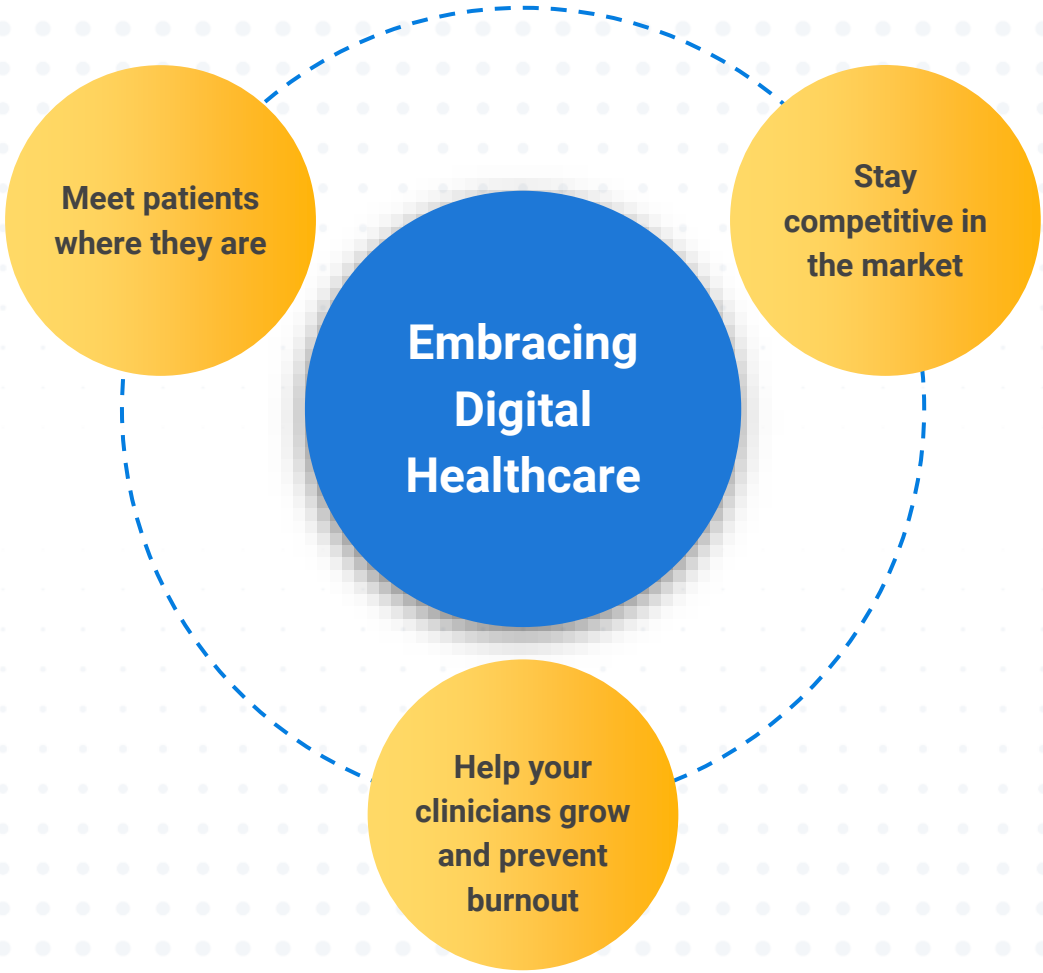

Consumerization of Healthcare

Rapid Growth of Digital Care

+ Capacity Challenges

Digital Care Is Here to Stay

Let's break down some

Myths of Digital Healthcare

Myth 1

Digital care replaces the clinician/patient relationship

We believe digital care should strengthen
that relationship but never replace it.

By providing patients with digital tools and patient education they can access at home, you increase their self-efficacy. That's important because a 2020 study found that increased self-efficacy is associated with lower pain intensity and higher perceived clinical improvement.

[Souza et al, 2020](#)

Myth 1

Digital care replaces the clinician/patient relationship

Reality of Digital Care

- Enhances communication
- Improves access to care
- Generates more clinical encounters and more clinical data

Myth 2

Patients must be treated in person

Digital physiotherapy can be as effective (or more effective) for certain patients.

Estebanez, 2023

Digital physiotherapy can be as effective (or more effective) for **certain patients.**

Estebanez, 2023

Providers need to **optimize care plans for their patients' individual needs and preferences.** That's key to driving optimal outcomes.

4 out of 100
patients actually
get conservative
therapy

Myth 2

Patients must be treated in person

Reality of Digital Care

Adopting digital care solutions as part of core services and layering them in where appropriate can **drive better outcomes than traditional care alone.**

Myth 3

Patients and providers aren't ready for digital care

2019

2020

2021

2022

2023

2024

Medicare telehealth
visits soared by nearly
6,000%, from **840K** in
2019 to **54.5M** in 2020

[JAMA. 2022](#)

2024

Medicare telehealth
visits soared by nearly
6,000%, from **840K** in
2019 to **54.5M** in 2020

[JAMA. 2022](#)

Telehealth
accounted for
**nearly 30% of
all visits**

[ASPE. 2023](#)

2019

2020

2021

2022

2023

2024

Medicare telehealth visits soared by nearly **6,000%**, from **840K** in 2019 to **54.5M** in 2020

[JAMA. 2022](#)

Telehealth accounted for **nearly 30% of all visits**

[ASPE. 2023](#)

25% of patients engaged with a telehealth service, up from 5% before the pandemic

[AMA. 2023](#)

of patients are interested in **broader digital health solutions**

[McKinsey, 2022](#)

70% of surveyed physical therapists were not convinced remote care could complement traditional physical therapy in the future

[Rausch et. al. 2021](#)

Clinicians cited **lack of familiarity as a barrier** to using digital care tools

[Button et. al. 2018](#)

Myth 3

Patients and providers aren't ready for digital care

Reality of Digital Care

It's often providers who are more hesitant about digital care.

Traditional Care

Digital Health

The tools and content you need to get your clinicians **excited about digital care** and give them the knowledge and skills to integrate it into their practice effectively

INTRODUCING

Digital Health Academy

What Is the Digital Health Academy?

- Empowering clinicians to practice at the top of their license
- Enhancing access to care
- Meeting patients in their comfort zones
- Mitigating professional burnout

Improve quality of care, patient outcomes, and staff satisfaction with digital health

Training and Empowerment

Patient-Centric Care

Positive Work Environment

Digital Health Academy

Foundations

Reinforcement

**Advanced
Development**

Foundations

- What Is Digital Care?
- Strategies for Effective Digital Engagement
- Patient-Centered Care Through Digital Platforms
- And more!

Foundations

- Understanding what digital care is and where it may be helpful for their patients
- Overcoming common misconceptions and biases that can hinder the effective use of digital tools

Introducing Digital Care to Your Patients

MEDBRIDGE

Program Tenets

1

Digital care is a value add, not a burden

2

Digital care can complement traditional care

3

Digital care can be used across patient populations

Reinforcement

- Motivational Interviewing for the Modern Clinician
- Modern Strategies for Advancing Therapeutic Alliance
- Telehealth: Comprehensive Virtual Care
- And more!

Strategies for Implementing Digital Care

- Discuss with coworkers
- Actively listen to fears, challenges, and pain points
- Build checklists

- Behavioral and Marketing Psychology
- HEP Adherence Best Practices
- Therapeutic Alliance and Patient Engagement

Why Telehealth?

- Reduced travel time
- Improved convenience
- Improved patient engagement and self-management
- Cost-effective
- Improved session attendance

MEDBRIDGE

Improved patient-therapist relationship accounted for 18–23% of the variance in patient adherence. Patients and therapists acknowledge that effective communication improved adherence.

[BMC Health Services Research, 2017](#)

Motivational Interviewing for the Modern Clinician

Unlock the transformative power of motivational interviewing to improve patient engagement, adherence, and care outcomes.

Modern Strategies for Advancing Therapeutic Alliance

Elevate patient care and improve outcomes by mastering communication strategies to build therapeutic alliances and enhance patient engagement.

Telehealth: Comprehensive Virtual Care

Gain the skills and learn best practices in order to provide optimal virtual care.

A Comprehensive Guide to Pediatric Telepractice

Distinguish yourself as an expert in pediatric telepractice by advancing your knowledge in tele-evaluation and teletherapy.
